

Can you make an old fire truck handle like an SUV?

We think so. Our expert technicians will add TAK-4® independent front suspension to take your Quantum®, Lance®, Dash®, Arrow XT™ or Enforcer® chassis' performance to a whole new level.

Your TAK-4 independent front suspension installation includes:

- New shock absorbers
- New front suspension arms
- Torsion bar controls
- New steering knuckles and assembly
- 17" disk brake rotors
- Up to 45° cramp angle
- Up to 24,000 FAWR
- Suspension travel up to 10 inches
- Road testing
- Limited 1-year parts and labor warranty
- 3-year warranty on steer gears

Talk to your Pierce representative about refurbishment, repairs, modifications, retrofits and overhauls. Look no further than the name you trust.

Look to Pierce Regional Service Facilities.

REGIONAL SERVICE FACILITIES: TAK-4® INDEPENDENT FRONT SUSPENSION UPGRADE

How to get a TAK-4® independent front suspension system without hitting a big bump in your budgeting process.

By adding a TAK-4 independent front suspension system to your existing fire truck, your Pierce Regional Service Facility can give you a safer, smoother ride.

The TAK-4 independent front suspension transforms the way your fire truck responds, stops and rides. By using computer-designed cast front suspension control arms, specially calibrated torsion bars and massive 17" brake rotors, this revolutionary system:

- **Shortens stopping distance by up to 23%**
- **Improves handling**
- **Improves ride quality by 340% (as measured by accelerometer testing)**
- **Enhances vehicle control**
- **Increases front axle capacity**
- **Simplifies maintenance**
- **Extends brake component life**

It means your vehicle rides more like an SUV than a fire truck. And you can get all this without incurring a nasty jolt to your budget.

Your Pierce Regional Service Facility will also give your existing truck a thorough inspection and complete tune-up. And they offer a wide range of advanced performance technologies – so you can work more safely and efficiently than ever before.

For example, you could get a:

- Hercules® Compressed Air Foam System for drilling firepower right to the source.
- Husky® foam system that delivers serious knockdown capacity without drawing serious amp.
