An Oshkosh Corporation Business

CLEARSKY
INTELLIGENCE™

Performance That Goes Above and Beyond

CLEARSKY INTELLIGENCE™

Pierce® ClearSky Intelligence™ Telematics Solution Empowers You and Your Fleet to be Effective and Efficient

Real-time performance data and reporting on more than 100 data points for fast fault troubleshooting, operational vehicle monitoring, maintenance planning, and budget control.

- Easy to install and integrate into your apparatus.
- Quick, accurate operational checks.
- Help reduce turn-around time for return to service.
- Determine where response coverage may be needed before the next call.
- Early troubleshooting with real-time fault notifications.

Current data points include:*

DRIVETRAIN

Hours & Mileage
Fuel, DEF, & Coolant Levels
Engine Oil & Coolant Temperatures
DPF Soot Load
Battery Voltage
Brake Pressures
Fuel Consumed
Idle Time & IRT Usage

AERIAL

Aerial PTO Hours
'Live' Aerial Status
Hydraulic Oil Pressure/Temperature
Breathing Air Level
Aerial Water Flowed
Turntable & Tip Control Status
Basket Tip Temperature

SUPPRESSION

Water Level
Foam Level
Pumping Status
Foam Used
Generator PTO Hours
Water Flow Rate
Water Used

** Not inclusive and dependent upon installed equipment options.*

Pierce® ClearSky Intelligence™ Telematics Solution

Integrates With Your Operations Software

- Application Programming Interface (API) integrates with records management systems, maintenance software, fire station dashboard, or other management tools
- Seamless collection, tracking and reporting
- Helps improve accuracy and reduce workload

Elevates the Command Zone™ System by Connecting Firefighters with Their Apparatus

- Monitors and collects data from installed systems throughout the apparatus.
- Provides visual access to all data in the cab, on scene, and remotely to enhance apparatus response and maintenance operations.
- 100+ data points are available, with new features introduced every 10-12 weeks.

Delivers Information and Communication When, Where, and How it is Most Useful

- Help ensure your apparatus is performing at optimal levels at all times, especially in the moments when you need it most.
- Monitor and anticipate maintenance before it is urgent.
- Scalable and retrofittable for a single apparatus or an entire fleet.

Enhances Decision-Making, Reliability, and Response Readiness

- Real-time apparatus metrics and location tracking
- Enhanced accountability for fleet deployability
- Early trouble-shooting with real-time notifications
